Hazardous Weather

Hazardous Weather

It will be mostly cloudy and cool, with increasing rain chances today. The best rain chances will reside in the Rolling Plains this afternoon and evening. A couple of thunderstorms could briefly become strong and produce small hail and heavy downpours. Highs will be mostly in the lower to middle 60s, though a few spots may not make it out of the 50s.

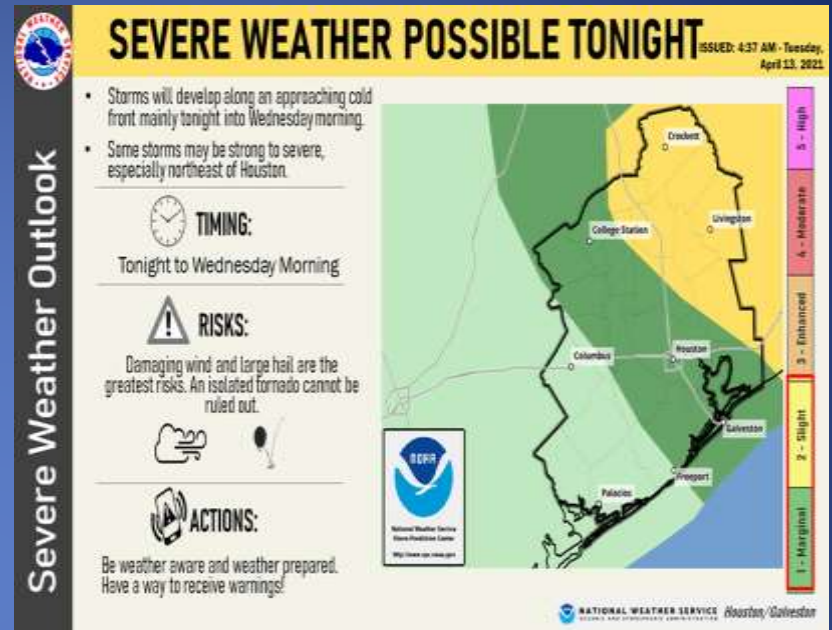

We continue to monitor the potential for severe storms across the southeast late afternoon/evening. If storms develop they could produce large hail and damaging winds. Another round of scattered showers/storms will move to the north/west this evening...small hail will be the main threat. Otherwise, highs today will range from the upper 60s across the far west/northwest to 70s elsewhere.

Hazardous Weather

Some strong to severe thunderstorms will be possible this afternoon and tonight across much of East Texas and North Louisiana. Large hail and damaging winds will be the primary threats.

Severe storms are possible tonight as a cold front moves into the area.

Hazardous Weather

Slight chance of Severe Weather Today

The main threat will be from hail and winds

Weather Forecast Office
Lake Charles, LA
Issued Apr 13, 2021 5:34 AM CDT

Cloud skies with showers and thunderstorms increasing through the day. A slight chance for severe thunderstorms with the main threat from large hail and strong winds. The best potential will be during the afternoon across south central Louisiana. Clouds and storms today will help to hold down temperatures off of yesterdays highs. Winds will be variable this morning 5 to 10 mph becoming more easterly during the day.

Today

Below-normal temperatures...
